

Revised Sunnyside School Philosophy Statement

DRAFT – November 2018

Sunnyside School is a small, intimate community learning environment that supports the whole child.

Teachers, as mentors, provide students with rich, diverse learning tasks that are student-centered and interest-based. Our teachers honour all aspects of each child's needs: personal, emotional, intellectual, physical and social.

Students learn 21st-century life skills, such as collaboration, problem solving, and global and self awareness. The arts, outdoors and technology are all embedded in scaffolded, cross-curricular learning.

Leadership concepts and language are heard throughout the building as students participate in multi-aged activities and fun, school-wide events. This provides students a positive, fulfilling experience during their years at Sunnyside.
